NOT CHILD'S PLAY, THIS.

THE EVENING WORLD presents more evidence to-day in proof of the feasibility one of the engineers who surveyed the lighting are only a question of money. the sentence. "Of course," he says, "the present but I don't see why such a plan is not only possible but also feasible."

And this is the view of a score of other stacle in the way of making the tunnel that historic spot. sa'e. At first its managers admitted that it was not safe, and blamed the city Alliance will yet fulfil a great political desis trying to prove that it is absolutely without danger.

But its efforts may or may not be attended with success. The people want the tunnel ventilated, and THE EVENING WORLD is championing the people's cause. If honest effort and hard work will accomplish anything, remedies will be applied.

This is a war to the knife.

DIED FOR DUTY.

A fireman lost his life at the Bleecker street fire. When the worn-out laddies of No. 2 Patrol returned to the station-house they did not know that they were leaving him to play and object to the only work be can do one of their comrades crushed and charred beneath the smoking ruins.

Fireman James Spellman, in obedience to Capt. Grove's command, made his way to the third floor to check the flames. But the fire had cone too far and before he could escape the roof fell in, burying him in a flaming tomb.

Again and again does the New York fireman show that he is a hero. Whether he dies in some attempt of noble daring to save life or perishes in the discharge of the ordinary duties of his calling he is worthy of the highest admiration. Spellman was a widower and left a son ten years of age. It is only the most ordinary recognition of the noble fellow who died to see that this child and whoever else depended on the fireman be provided for. Let us show some appreciation of a Department which deserves so much gratitude.

CLUB WARFARE.

The Union Club has taken an unusual step which indicates a recognition on its part of the influence the new club of the millionaires will have upon it, and shows a timely attitude of defense. The Governors will hold a special meeting in April to elect 300 new members from the waiting list. This will probably draw many possible members from the new club.

Such rivalry is interesting. The Union Club is so much akin to the proposed new club that there will not probably be a desire on the part of its members to belong to the millionaires' association. Especially if the two clubs regard each other with haughty disdain. The Union is taking time by the forelock, at all events, and is showing fight.

On July 4th, America's great day, THE EVERING WORLD came out in the glorious red, white and blue. On Memoria Day it was in blue for the gallen soldiers who so nobly fought and died. On St. Patrick's Day it was in green for those of our citizens whose fatherland is Ireland, THE EVENING WORLD is the People's Paper. It is American to the backbone, but it recognizes all and is with-

Unpleasant reports of turbulent feeling and possible outbreaks among the Ogalialias and the Brules lend an unpleasant aroma to the winds blown hither from the West. It should not be hard to find out their grievance, and one good way of averting a calamitous Indian uprising would be to remove the cause of complaint. This is so much better than shooting reasonably discontented red men.

The White Star steamship Majestic bas cored the best record of this year from Queenstown. Her trip was made in five days, twenty-three hours and thirty minutes. The present record for transatiantic celerity will probably be broken this year. Why should it not be narrowed down to five days ?

Some women will get into politics whatever the laws may not do for them in the way of suffrage and Woman's Rights. A Cape May lady, irritated by a procession of centre often, and growing palms are introa different political complexion from her own, playfully soused it with a hose. Truly, the ways of women are many.
